HDCVI Digital Video Recorder - 4 CH HDCVI or CVBS / 1 CH audio / 2 IP - 720p (25FPS) - No alarms - VGA and HDMI Full HD outputs

Branded Universal HDCVI standalone digital video and audio recorder.

It has 4 video inputs by BNC connection, allowing HDCVI and analogue CVBS cameras interchangeably at the same channel, and 1 audio input by RCA connection. It has 1 RCA audio output and 2 video outputs: a VGA output and a Full HD HDMI output. Embedded Linux operating system, with pentaplex multitasking that allows: live viewing, recording, playback, backup and remote access simultaneously.

Compression of video H.264 and audio G.711. Video recording at 25 FPS per channel in resolution 720p. In addition, it allows you to add IP cameras to replace analogue channels, with a maximum resolution of 1080p (Max Bitrate. 10 Mbps). Various recording methods: Manual, scheduled, by motion detection. It supports storage at 1 SATA internal drive of up to 4 TB. No alarms. Privacy mask and watermark system, to check if a video has been manipulated or not. PTZ cameras control via port RS485.

Easy to use thanks to its intuitive graphical menu, it is delivered with USB mouse. External Backup via USB devices (memory, hard drive or recorder) and via Ethernet. It has network output RJ45 that gives a powerful remote access via web browser (using ActiveX), via PSS

software or application for smartphone. Supports Dual Stream, which gives fast and fluent access to the Internet. Supports DDNS, which will allow easy remote access even with dynamic IP.
