CHUANGO KP-700

Standalone keypad - Wireless - Internal antenna - Permits arming/disarming - Compatible with proximity tags - Power supply 3 AAA batteries 1.5 V LR6

Independent keypad to arm / disarm alarm system. It is compatible with the alarm panel with which it communicates wirelessly and allows you to arm and disarm the alarm through your numeric keypad or through proximity key fobs.

You can place this keypad at the door of your home or office and hide the alarm panel in a safe place. So even if an intruder enters and sabotages the keypad, the alarm panel will continue to work and will receive the signals from the detectors, activate the siren and send the alert to your phone.

- - Allows arming / disarming / partial arming / SOS via the keypad
- - Wireless connection 433 MHz with the panel with a maximum reach of 80 m
- - Compatible with proximity keychain for disarming (it can be discharged by up to 50)
- - Equipped with tamper
- - It can activate/deactivate a wired electronic lock
