MARCA BLANCA MF-CARD-50P

x50

Proximity card - Identification by radio-frequency - Passive MF - Frequency 13.56 MHz - Suitable for card printers - Pack of 50 cards

RF proximity card.

Allows automatic identification of the user by radio frequency, MF . Passive card, when in proximity to the reader is activated by magnetic induction. When activated (electromagnetic induction) it returns a code to the system so requires no battery.

Communicates with the reader via an RF antenna at 13.56MHz.

Manufactured in PVC and with a similar size to most credit cards so can be transported in most card wallets. Suitable for customization using a card printer.

Pack of 50 cards.
