SAFIRE MIC02

External microphone - Bare cable for terminal block connection - Power + (Red), Power (Black)
- Audio (White) - Power supply DC6V~12V - Length: 130 mm

External microphone attachable to any camera.

Reduced dimensions and simple installation. Can be installed in video surveillance systems together with cameras that do not have a microphone, connected to video recorders with audio and video. In this way, the recorded signal will count with the video of the camera and with the audio provided by the microphone.

Terminal connection Power + (Red), Power - (Black) and Audio (White).
