CHUANGO PIR-800

PIR Detector curtain type - Wireless - Internal antenna - Low battery LED indicator - Detection type "virtual curtain" - Power supply 2 AAA batteries 1.5 V LR6

PIR motion detector curtain type, wireless, to the alarm system. Can detect any intrusion to occur in front of the detector, sending an alert to the panel that will trigger the alarm.

This detector has the peculiarity that it creates a "virtual curtain" in front of it, with dimensions of 5 meters long, 3.6 meters in height and angle 15° (1,3 final meters). Any object or person that passes through this virtual curtain will be detected by the PIR. It is particularly suited to very effectively cover windows, skylights, room entrances, etc..

- - Virtual curtain: 5 metres (Length) x 3.6 metres (Height) x 15° (Angle)
- - Wireless connection 433 MHz with the panel with a maximum reach of 80 m
- - Integrated self-regulating temperature system and anti-turbulence air technology
- - Possible to install on ceiling or wall, vertical or horizontal
- - Light warning when the battery is low (approximate battery life, 2 years)
- - Equipped with tamper
- - Low power consumption when in sleep mode due to inactivity
- - Test button, to adjust the installation of the detector
