MARCA BLANCA ABL100-18510A

Infrared barrier detector - Wired | 10 beams - Max distance. The detection 100 m - Easy installation with LED and buzzer - Unique address for each tower - Relay output NC/NO | Power supply 12~18VDC

- Kit of infrared towers (emitter/receiver) of 10 beams for outdoor
- Wired
- Maximum sender / receiver detection 100 m (exterior)
- Connection of each tower: an address
- Horizontal alignment angle 180° (± 90), vertical not adjustable
- 2 work frequencies
- LED light to illuminate and camouflage as garden lights
- Power supply 12~18 VDC
- Highly resistant PVC tube
