AJAX AJ-STARTERKIT-CAM-4G-B

Professional alarm kit - Certificate Grade 2 - Ethernet and dual SIM communication 4G (LTE) - Wireless 868 MHz Jeweller and Wings - Ajax HUB 2, 1 PIRCAM - 1 magnetic contact and 1 remote control

AJAX professional anti-intrusion alarm system with bidirectional wireless communication.

The wireless link has a high reliability due to its advanced Jeweller protocol with high security AES encryption. The unique instant and intelligent monitoring system detects inhibition of the signal identifying a specific downtime and in turn reduces maintenance costs as it significantly extends the life of the batteries of the detectors without compromising security. The wireless signal is able to cover distances up to 2 km in open space. It also includes features to ease the installation such as the Smart-Bracket or the simple linking of detectors to the alarm system.

It allows up to 100 wireless zones with the possibility of grouping these devices up to 9 different groups, where the different actions can be carried out; armed, partially armed, disarmed. These Ajax wireless devices have different possible configurations such as 24 hours zone, zone with time delay of entry or exit...

The panel AJ-HUB2-4G-B has an AC power input 110-250 V and also a rechargeable backup battery with duration of up to 16 hours. This central incorporates the Wings radio protocol to receive images from the AJ-MOTIONCAM-B photodetector.

Ethernet communication and 4G connection are its main advantage for remote access, both for the user and the installer, as it allows connection through the AJAX PRO Desktop PC software and the mobile applications for iOS and Android Ajax Security Systems (end user) and AJAX PRO: Tool for Engineers (professionals). Through these applications it is possible to configure the entire system, manage users and their permissions, add devices, group them into rooms and modify their configurations. The use of the cloud is compatible with dynamic IP without opening ports.

The Ajax users will enjoy multiple advantages, as they can receive reliable and instant notifications in both desktop software and mobile applications. As an additional complement to the Ajax alarm system, from the mobile application you can add up to 25 IP cameras or video recorder channels to be able to verify the video stream live.

The kit includes the hub AJ-HUB2-4G-B, a photodetector AJ-MOTIONCAM-B, a magnetic contact AJ-DOORPROTECT-B and a remote control AJ-SPACECONTROL-B.
