CHUANGO SOS-100

SOS button (panic) - Wireless - Lightweight with key loop - Activates the alarm panel - Panel armed or disarmed - Suitable for elderly people

Wireless panic button which when pressed informs the alarm system, which will perform the programmed actions (reporting by SMS/phone call, activate siren, etc.).

Thanks to its simple design, it can be carried as a key-chain and hereby you have it always at hand.

- - Works with the alarm panel
- - Once pressed, it activates the alarm system no matter its status (armed/disarmed)
- - The alarm system will perform the programmed action, such as notifying by SMS, call or activate siren
- - Lightweight and with pendant, so it can always be carried around
- - Especially suitable for elderly people
