TOW-L75S

Solar Power - 864 Wh - Remote supervision of systems

High efficiency solar charge controller (minimum 96%), can operate with any type of solar panels regardless of battery voltage.

The charging profile is optimized for LiFePO₄, batteries, ensuring maximum efficiency and safety.

Modern MPPT (maximum power point tracking) algorithm to achieve maximum efficiencies even with partial or poor insolation.

Poe Industrial Switch and DC-DC Industrial DIN Converter 9-18Vdc not included
