UNI-TREND UT343D

Coating thickness measurement - Suitable for ferrous and non-ferrous materials - Continuous and specific measurement - Data storage : USB connection to PC - Automatic shutdown - PC connection

- UNI-T
- Metal coating thickness gauge up to 1250?m
- Compatible with ferrous and non-ferrous materials
- 2 inch TFT LCD backlit display
- Continuous and spot measurement method
- Characteristic values: MAX/MIN/AVG
- Storage of up to 500 measurements
- Conversion of units
- Automatic screen rotation
- Audible and light alarm
- PC connection via USB (software available)
- Quick test mode
- Low battery indicator
- Automatic shutdown
