UNI-TREND UT714

Temperature process calibrator - LCD display up to 2000 accounts - Makes measurements of thermal probes and RTD's - Performs voltage and resistance measurements - USB communication available - Automatic shutdown

- UNI-T
- Multifunction process temperature calibrator
- Valid for thermocouple, RTD's, voltage and resistance measurements
- Valid for calibrating different types of temperature sensors
- LCD display up to 2000 accounts
- Passage/ramp functions
- Rechargeable battery
- Source and measurement accuracy up to 0,02 %
- Contrast adjustment
- Automatic shutdown (adjustable time)
- USB communication
- Stores and retrieves configurations
