MARCA BLANCA BODYTEMP-256-USB-I

Thermographic camera with PC monitoring - Real-time body temperature measurement - Thermal resolution 256x192 | Accuracy $\pm 0.5^{\circ}\text{C}$ - Thermal sensitivity $\approx 50\text{mK}$ - Temperature measurement on faces at up to 2 m of distance - Suitable for integration via UVC protocol

- Thermographic Camera
- Resolution 256x192
- Accuracy $\pm 0.5^{\circ}\text{C}$
- Face detection: To filter out any warm objects in the scene
- Detection of up to 4 people
- Temperature measurement at up to 2m distance
- Connection via USB-A or USB-C PC software
- High temperature sound alarm
- Suitable for integration via UVC protocol
- Thermal image capture in case of high temperature
