UV-OET-213H-BTM32

Temperature Access Control - Detection of fever and mask - Facial recognition and MF card - 10.000 faces, 100.000 registrations - TCP/IP, USB | Forehead detection - Mounting on the wall or with a floor stand

- Uniview
- Stand-alone biometric access control reader
- Identification by facial recognition and MF card
- Body temperature measurement
- Accuracy ±0.3?
- Forehead fever detection
- Configurable alarm if the person isn't wearing a mask
- 7" LCD color touch screen
- Up to 10.000 faces & 100.000 registers
- TCP/IP Communication
- Integrated controller (Door sensor, Push-button & Relay)
- Dual sensor camera for face recognition
